

*Even Girls can learn it!*

# LOVELY ZOPE 3 TAMING

*Your Trainer is world famous Zope Tamer*

## PHILIPP VON WEITERSHAUSEN

Author of „Web Component Development with Zope3“ the maestro will present a fine selection of his master pieces, such as:

### *Introduction to Zope 3*

Introduction of trainer, organizers, participants  
Getting started: Installation, setting up a sandbox  
Getting pixels on the screen: Simple browser pages, ZPTs  
Pushing logic out of ZPTs: Complex browser pages with Python  
Automated forms with zope.formlib

### *Storing and publishing data: the Component Architecture*

Zope's Object Filing System  
Data persistency with the ZODB  
Diving into Interfaces and Schemas with zope.interface  
Diving into the Component Architecture: i18n with zope.i18n

### *Using the Component Architecture*

Data persistency revisited: containment constraints and SQL  
Skinning with zope.viewlet  
More adapters: storing metadata with zope.annotation  
Dynamically enhance an application with events

### *Advanced uses of the Component Architecture. Security*

Vocabularies  
Local components  
Indexing and searching with zope.app.catalog  
Sessions  
Overview over Zope's security system  
Custom Authentication
